Triax Shade Structures

The Triax System is adaptable and an alternative option for waterproof shade.

The system allows two crossing pipes to be joined permanently, without welding.

With this system the tension of the membrane cover is not transmitted to the mounting points, instead being contained within the frame itself.

Unlike the traditional membrane covers, the structural integrity of existing buildings is not compromised by the addition of a Triax structure.

ROOF MATERIAL:

- Commercial Grade Reinforced PVC
 - ⇒100% UV Protection

POSTS, FRAME AND CONNECTIONS:

- Galvanised Steel Framework
 - ⇒Powder Coated to Select Colour
- 10 Year Structural Guarantee
