## Cyclone

Unpitched Percussion

## Cyclone

Model: Unpitched Percussion

### Dimensions:

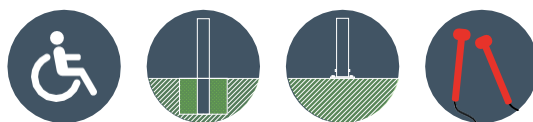

- Weight: 25kg                      Width: 20cm                      Depth: 58.5cm                      Height: 120cm

Spinning the wheel will set the ball bearings inside the wheel into motion to mimic the sound of falling rain. From a gentle pitter-patter through a heavy rain shower to a full-on monsoon, players can control the intensity of the rain sound by how hard they spin the wheel, demonstrating the concept of cause and effect and encouraging gross motor skills.

Mounted on a sturdy stainless steel frame, the Cyclone is made of two HDPE panels embellished with thunderbolt aluminium inserts. The diameter is 460mm.

### Product Highlights

- Multi-generational Fun
- Visually and Auditorily Stimulating
- Inclusive and Tactile
- Engaging Sensory Resource
- Encourages Gross Motor Skills

*NB: Installation through existing **synthetic grass**, repairs will be carried out but will be unable to match existing quality.*
