Tubular Bells

C Major Pentatonic (A3-C5)

Tubular Bells

Model: C Major Pentatonic (A3-C5)

Dimensions:

Weight: 59kg Width: 10cm Min Height: 160cm Max Height: 220cm

These big, bold, beautiful bells have outstanding resonance. The bells produce deep tones which you can feel as well as hear.

The set of seven aluminium ‘bells’ ranges from 1.6m to 2.2m tall, are all 100mm in diameter, and are pentatonically tuned, ranging from A3 to C5.

Built with durable materials designed to withstand harsh environments, the centre post is strengthened, and the outer tubes are fixed using stainless steel security screws located top and bottom.

The set of seven chimes also comes with two metal posts, each with a large mallet attached by steel cables. There are various ways that the chimes can be arranged, as the mallet posts offer a considerable range. However, we recommend putting them in a horseshoe shape to create a surround-sound effect and noticeable vibrations for anyone standing in the middle of the shape.

Simple yet striking, these bells bring an architectural feature to your outdoor area and a unique auditory experience.

Product Highlights

- Tall and Striking
- Vandal Resistant
- Highly resonant
- Disabled Access / ADA Accessible
- Sensory Rich - perfect for inclusive playgrounds and sensory gardens

*NB: Installation through existing **synthetic grass**, repairs will be carried out but will be unable to match existing quality.*
